I'm a Fullstack Engineer with over 5 years of experience building web apps. I've worked with a bunch of cool tech like React, Svelte, SvelteKit, NodeJS, NestJS, Vue, and a bit of Golang. I love turning ideas into reality and solving problems with code.

## Experience

### Viorex

Lead Front-end | May 2024 – Present

- Helped 3 junior developers level up their skills, creating a fun and productive team vibe that boosted productivity by 2x.
- Set up a monorepo system with 6+ repos, making it super easy to share code and cutting deployment time by 40%.
- Streamlined team workflows by automating processes with GitHub Actions and Docker, reducing manual tasks by 60% and freeing up valuable time for development.
- Created a library of 30+ components and 12 utilities, speeding up development by 50% and keeping things consistent. Also built a system to support 15 color themes, making customization effortless across the app.
- Managed priorities and tasks to keep projects on track, hitting deadlines 95% of the time.

### Lampa Software

Full Stack Developer | May 2023 – May 2024

- Developed and maintained server-side functionalities, including API logic.
- Improved system reliability by building secure APIs. Created connections between the front-end and back-end.
- Presented 4 talks to the team about modern frameworks and tools like Svelte, SvelteKit, React Hooks, and React state management techniques, boosting adoption and keeping the team up-to-date with the latest trends.
- Made sure apps worked smoothly on all kinds of browsers.

### Biveri

Middle Front-end Developer | November 2021 – May 2023

- Led front-end side of the project from the initial idea to the final product.
- Reviewed 120+ pull requests, catching bugs and enhancing code quality with over one-third improvement.
- Mentored 2 junior developers, hosting monthly training sessions and helping them solve 90% of their toughest challenges
- Built 4 libraries—UI components, Hooks, Utils, and Services—that improved code reusability and accelerated development by 40%.

### Arixess

Junior Front-end | March 2020 – November 2021

- Helped build and improve server-side features. Wrote code for the API to power the service.
- Quickly adapted to changing project goals, rolling out 10+ major updates on time.
- Jumped in to create 5 new features that made the app easier to use and more useful for users.
